PREFACE

The *Directory of Soviet Officials* identifies individuals who hold positions in selected party, government, scientific, and public organizations of the USSR. It may be used to find either the incumbents of an organization or the positions of given individuals. For some organizations, it serves as a guide to the internal structure of the organization.

Coverage. This publication supersedes *Directory of Soviet Officials: Science and Education* (LDA 87-11012, May 1987). It identifies individuals who hold positions in or are members of selected scientific and educational organizations. It is one of a three-part series: the other volumes deal with national- and republic-level organizations.

Because of the broad scope of the Science and Education Directory, the level of coverage within any particular organization is necessarily limited; most organizations listed herein are covered only through the level of director. An index of major organizations and a personality index appear at the end of the publication. Duplicate names in the personality index refer to different individuals who have the same name.

Directory Abbreviations and Dates. The date an individual assumed his position is listed in the position" column. Dates are preceded by the abbreviations ap" (appointed), el" (elected), or id" (identified in the position). Partial dates are given when exact dates are not known (for example, when identifications are taken from books or periodicals). Dates of birth are listed in the birth" column when known. In most cases, only the last two digits of a year are listed. For example, 97 refers to 1897, 00 indicates 1900, and 17 indicates 1917. Dates are given in full where known. The highest earned academic degree and/or the military rank are listed for some individuals. A list of abbreviations follows the Table of Contents.

Rendering of Proper Names. Transliteration generally follows the system authorized by the Board of Geographic Names (BGN). Non-Russian names (such as those of Ukrainian or Estonian origin) for which original Latin alphabet spellings or separate BGN transliteration systems exist are treated as Russian names and are transliterated from their Russian spellings. (For instance, the Ukrainian surname Honchar" is rendered Gonchar.") Exceptions are the cities of Kiev (BGN spelling is Kiyev), Klapeida, and Vilnius and the names of the republics themselves, which reflect accepted Westernized forms (Lithuania" for Litva," "Georgia" for Gruziya," etc.).

Organizations. An effort has been made to verify and standardize the names of organizational components and the position titles of individuals, but some unverified entries remain for names whose sole source is a non-Soviet publication. Organization names are listed in English, but the word

order varies slightly. The names of universities and a few other institutions follow the Russian word order. The English-language form of most organizations, however, is as follows: descriptive term(s); type of organization; *imeni* (named after); location (e.g., Applied Mathematics Institute *imeni* M.V. Keldysh, Moscow). Beneath the names of most of the major organizations are short notes relating to the date of establishment and the general functions of the organization. For the purposes of this directory the symbol used to transliterate the Russian "soft sign" (') has been omitted from place names, although the soft sign remains in personality names. The index to major organizations includes the English and Russian transliterated versions of organization names, together with their acronyms.
